Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 13, 2007 has been entered.

Claim Objections

Claims 22 and 31 are objected to because of the following informalities:

Regarding claim 22, on the second to last line, the language "between first and vertebrae" is unclear. The Examiner suggests inserting "second" after "first and" in order to overcome this objection.

Regarding claim 31, line 12, the language "the distal end of the cutting portion" lacks clear antecedence. The Examiner suggests replacing this language with ---the second end of the cutting portion--- in order to overcome this objection. Appropriate correction is required.

Specification

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3774

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15, 17, 18, 20, 22, 25, 26, and 29-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Michelson (US 5,484,437). Michelson anticipates the claim language where the proximal handle as claimed is element (135) of Michelson (see Figure 2 and column 12, line 50 et seq.), the shaft as claimed is element (111), the first non-cutting portion as claimed is element (152), the cutting portion as claimed is element (120), and the second non-cutting portion as claimed is the end of element (120).

With regard to claim 20, the Applicant is directed to column 1, lines 19-39.

Claim Rejections - 35 USC § 103

Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Michelson (US 5,484,437). Michelson meets the claim language as explained in the Section 102 rejection but fails to disclose repositioning the implant as claimed. However, the Examiner asserts that it would have been considered *prima facie* obvious to an ordinary artisan to reposition the distractor or implant of Michelson in order to get a better fit or to correct the position of such a device.

Allowable Subject Matter

Claims 16, 23, 24, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Art Unit: 3774

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
